DETAILED ACTION

Claim 98, 99, 106, 109 and 100 remain. All have been placed in independent form except for claim 110.

Specification

The replacement tables cannot be entered. The instruction must provide line numbers as well. Thus, applicants should say, "Please replace the table beginning at page 30, line 2 and ending at end of page 38, with the replacement Table 1 in Appendix B...." The same is true for the deletions on page 28 and 46. In addition, page 28, line 10 and page 46, line 3 would also need to be deleted.

In addition, the first entry in the 4th from last sheet appears to have new matter. Applicants have replaced 3-pyrroline with 3-OH-pyrrolidino. This is a drastic change. The ring has been switched from one with a double bond to one without a double bond, and an extra OH group has been added.

Also note that entries 3 and 4 on that sheet, third column, retain some underscoring .

Table 2 page 42 has entries with the choice of "pyrrolomethylamino". This is impossible. The "pyrrolo" is a prefix meaning that the pyrrole ring is fused to another ring (as in e.g. "pyrrolopyrimidine"). However, there is nothing here to be fused to. Whichever choice is made for this substituent must have descriptive support in the specification.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially-created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 1624

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 106, 109-110 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 48, 79 and others of copending Application No. 09/929771. Although the conflicting claims are not identical, they are not patentably distinct from each other because overlapping subject matter is involved here and in the sibling case. For example, claim 79 in 09/929771 specifies R4 as 2-hydroxy ethyl, R2 as isopropyl, and R1 as 7 choices, one of which is 3-quinolinylamino.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1624

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 110 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The treatment of "proliferative disorders", including cancer, in general, is not enabled. The reasons were given previously in detail; the traverse is unpersuasive.

Claims 109-110 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no practical way to determine what the scope of claim 109 is. Specifically, who is "in need thereof"? The same is true for the dependent claim 110 as well. There is no way of knowing which proliferative diseases are covered by claim 110 and which are not. The traverse is unpersuasive.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1624

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
